The Coalition of Finance Ministers for Climate Action

Within the framework of Mexico's Sustainable Financing Mobilization Strategy, one of the very first countries to innovate with the creation of the Mexican Sustainable Taxonomy, which includes the gender equality index, Mexico was among the first countries in Latin America to implement a green budget tagging system and to establish our SDG Sovereign Bond Framework with Allocation and Impact Reports.

Minister of Finance and Public Credit

Edgar Amador Zamora, Mexico

The Coalition of Finance Ministers for Climate Action

In Colombia, we see sustainability not as a luxury but as a necessity and an opportunity to build a resilient, fair, and competitive economy.

Even with fiscal constraints, we are mobilizing green finance, aligning budgets with climate goals, and advancing public-private partnerships to turn challenges into catalysts for action.

Minister of Finance and Public Credit

Ricardo Bonilla, Colombia

The Coalition of Finance Ministers for Climate Action

For emerging economies like Eswatini, strong fiscal management and private sector collaboration are crucial to overcoming climate challenges and fostering sustainable development.

Minister of Finance

NEAL RIJKENBERG, Eswatini

The Coalition of Finance Ministers for Climate Action

Brazil's Ecological Transformation Plan shows that sustainability and economic growth are mutually reinforcing.

By mobilizing private capital through innovative mechanisms like the Eco Invest program and a regulated carbon market, Brazil is creating a blueprint for a just, inclusive, and climate-resilient economy

Vice-Minister of Finance

Tatiana Rositi, Brazil

The Coalition of Finance Ministers for Climate Action

Italy is committed to mitigating and adapting to global warming, including by promoting green finance and innovative public-private partnerships to bridge the protection gap against natural hazards and to ensure a just and sustainable transition.

Director-General of the Treasury

Riccardo Barbieri Hermitte, Italy

The Coalition of Finance Ministers for Climate Action

Climate action and economic prosperity are not mutually exclusive; they are mutually reinforcing. Together, we can transform fiscal constraints into opportunities for innovation and strategic collaboration.

Deputy Minister for Macroeconomic and International Finance

Parjiono Cipto Widarto, Indonesia

The Coalition of Finance Ministers for Climate Action

Climate action and economic prosperity are not mutually exclusive; they are mutually reinforcing. Together, we can transform fiscal constraints into opportunities for innovation and strategic collaboration.

Minister of State for Finance, Planning and Economic Development (General Duties)
Hon. Henry Ariganyira Musasizi, Uganda

The Coalition of Finance Ministers for Climate Action

In a time of constrained fiscal space, Nigeria's removal of long-standing fuel subsidies is an economic reform and a signal of policy credibility and our commitment to a climate-smart and inclusive prosperity. Through strategic use of blended finance, we are unlocking private investment in clean energy, showing that sustainable development and fiscal resilience can—and must—go hand in hand.

Hon.Minister of Finance & Coordinating Minister of Economy
Wale Edun, Nigeria

The Coalition of Finance Ministers for Climate Action

True fiscal sustainability can no longer be assessed in isolation from climate resilience. If our economies are vulnerable to droughts, floods, and ecological shifts, then the foundation of our revenue systems—and thus our fiscal outlook—is at risk.

Minister of Finance
Sariha Moya, Ecuador

The Coalition of Finance Ministers for Climate Action

Our land is small, but our sea is vast—1.43 million square kilometers. By protecting 32% of our marine areas, Seychelles' seagrass meadows are estimated to have absorbed almost 18 million tons of organic carbon but the country produces only 0.6 million tons annually. We are a Blue Economy leader and a negative net emitter.

Vice-President and Minister of Finance, National Planning and Trade
Ahmed Afif, Seychelles

The Coalition of Finance Ministers for Climate Action

Despite competing priorities, Estonia remains firmly on track to produce at least the electricity we consume annually from renewables by 2030.

Minister of Energy and the Environment
Andres Sutt, Estonia

The Coalition of Finance Ministers for Climate Action

Finance ministers are dealing with challenges ranging from rising inflation and unsustainable debt burdens to growing security concerns and increased international trade barriers.

Meanwhile, climate change poses macroeconomic risks to our long-term prosperity and economic stability. Furthermore, the costs of climate inaction far outweigh those of an orderly and just transition. Public finance alone cannot carry the weight; a stronger enabling environment is needed to spur private climate finance at scale.

Minister of Finance
Eelco Heinen, Netherlands

The Coalition of Finance Ministers for Climate Action

As the first country in the world to introduce a tax on greenhouse gas emissions from agriculture and livestock, Denmark is showing what's possible when strong analytics and inclusive policymaking go hand in hand.

Minister for Economic Affairs
Stephanie Lose, Denmark
